House of Commons Treasury Committee

Page 16 Point 45: “Brexit is likely to exacerbate the UK’s current interregional inequalities, which are already very high by international standards. Moreover, this conclusion holds largely irrespective of the eventual form of Brexit. The reason is that the UK’s economically weaker regions, especially in the Midlands and the North of England, are more exposed to Brexit trade-related risks because they tend to be much more dependent on EU markets for their prosperity than the UK’s richer regions.” Page 17 Footnote 59: University of Birmingham, City-REDI blog, 6 December 2018

Also, quoted in a parliamentary question asked by Tracy Brabin MP Batley and Spen, Labour & Cooperative to Philip Hammond, Chancellor of the Exchequer on 11 December 2018: “A buoyant high street is absolutely vital for communities such as mine in Batley and Spen. The Treasury Committee report released today suggests that northern towns are more exposed to Brexit trade-related risks than others. With that in mind, will the Minister tell us what has been put in place to support communities such as mine that

will be hardest hit post Brexit?” Column 129, Hansard 11 December 2018 See: <https://hansard.parliament.uk/commons/2018-12-11/debates/35E114FE-E408-4C05-9F79-A23122E42C13/OralAnswersToQuestions>

The material in the blog was also referred to by Barry Sheerman MP for Huddersfield in a Parliamentary Question to Kwasi Kwarteng, Under-Secretary of State for Exiting the EU, “Yesterday, the all-party parliamentary manufacturing group, which I chair, was told by a leading professor from the business schools of both Sheffield and Birmingham that, however we leave Europe, we will have a 4% to 5% drop in GDP, but that GDP in the constituencies and towns that voted to leave will drop by a crippling 17% to 20%. That may not include Spelthorne, where I grew up, but it will devastate this country’s manufacturing base.” 4 April 2019, See: <https://hansard.parliament.uk/Commons/2019-04-04/debates/4F4DF792-8C01-4E14-8BE7-8ECEF4694A38/NoDealUKManufacturingSector#contribution-16906C01-ED39-4EAB-AA6D-F37BA7EE523F>

Parts of the blog were also quoted verbatim in “Little Respite for Fly-Over Britain”, Kampfner, J., *The New European*, 17 January 2019

“Brexit is likely to exacerbate the UK’s current interregional inequalities, which are already very high by international standards. Moreover, this conclusion holds largely irrespective of the eventual form of Brexit.” The article also notes our observation that the word ‘regional’ only appears twice in the 585-page Withdrawal Agreement.

## Book or Article Reviews

The English language version of my textbook *Modern Urban and Regional Economics*, 2013, Oxford University Press, and its earlier version *Urban and Regional Economics*, 2001, Oxford University Press, is currently being used in over twenty countries, and is globally the best-selling book in the field. It has been translated into Greek, Korean, Japanese and Chinese. In addition, two of my other books have also been translated into Japanese.

My monograph books have all received very strong reviews in the academic literature.

The review of my 1998 Springer book *The Economics of Industrial Location: A Logistics-Costs Approach* in the *TESG Journal of Economic and Social Geography* (2000) reads “This is an important book which opens new perspectives on the analysis of location. The author demonstrates a high level of competence in dealing with rather complex micro-economic analyses. The major strength of the book concerns the theoretical aspects, and it is clear that McCann has really contributed to deeper insights in this respect”.

The prologue by Noboru Sakashita to the 2002 Japanese translation of my 1998 book *The Economics of Industrial Location: A Logistics-Costs Approach* reads that this is a “technically very difficult, but wonderful book”.

The review of my 2001 Oxford University Book *Urban and Regional Economics* in *Papers in Regional Science* (2003) reads “The text is very successful in achieving its stated goals, namely providing an introductory text for third or fourth year undergraduates or first year graduate students. The book is well written and accessible to more than just the intended audience.”

The review of my Edward Elgar 2002 book *Industrial Location Economics* in the *Journal of Economic Geography* (2003) reads “This is a valuable book which offers much insight”. The review of the book in the *Journal of Regional Science* (2004) reads “Overall, this volume is quite valuable on two fronts. It provides excellent surveys of the old, as well as the new, economic geography. It also provides insights into the newest methods, the newest questions, and some of the newest results, available from a growing number of economic geographers”.

The review of our (Iammarino and McCann) 2013 Edward Elgar book *Multinationals and Economic Geography* in *European Planning Studies* 2013 reads “Does this book live up to the hopes? The book does more than this...their contribution does take the discussion of the spatial dimension of multinational enterprises (MNEs) and economic geography to a much higher level... Nobody will be capable, after reading this book, to claim that economic geography and especially economic geography with a focus on MNEs is not a highly developed and also formalized science”.

The review of my 2015 Edward Elgar book *The Regional and Urban Policy of the European Union: Cohesion, Results-Oriented and Smart Specialisation* is described by Michael Storper as a “magisterial analysis”.

The review by Lelio Iapadre in *Growth and Change*, 47.1, 132-134, states that “This book can be a precious compass for students, researchers and practitioners...almost 60 pages of bibliography...give an idea of the enormous volume of work which was masterly digested into this book”.

The review by Sofija Adžić in the *Annals of Regional Science*, 58, 661-663, states that “Philip McCann has provided an outstanding book on current trends and future prospects of EU Cohesion Policy”.

The book is described as being “...exhaustively sourced,...especially authoritative and well-informed” by George Pomeroy in *Polymath: An Interdisciplinary Arts and Sciences Journal*, 2018

The review of my 2016 Routledge book *The UK Regional-National Economic Problem: Geography, Globalisation and Governance* by Sir Alan Wilson FRS FBA FAcSS reads “This is a tour de force, rich in

its depth of analysis of UK cities and regions, set in an international context. Its conclusions will challenge both researchers and policy makers and is essential reading. It is economic geography at its best!”

Andy Haldane, Chief Economist of the Bank of England, stated that “Philip McCann... has published an excellent book setting out a range of fascinating regional facts...”, SPERI Annual Lecture “Is all Economics Local?”, 7<sup>th</sup> May 2019, See: <https://www.bankofengland.co.uk/speech/2019/andy-haldane-sheffield-political-economy-research-institute-annual-lecture-2019>

The book was described as “a path-breaking study” providing “remarkable new evidence”, by The Rt Hon Gordon Brown, UK Prime Minister 2007-2010.

The review of *The UK Regional-National Economic Problem: Geography, Globalisation and Governance* in *Regional Studies* 51.3 by John Tomaney reads “This is an important book which brings fresh, well-founded and challenging insights to the UK regional problem... especially timely in light of the recent UK referendum on EU membership... the book presents a convincing challenge to the dominant theoretical and policy debates about regional development in the UK and its claims deserve wide debate.”

My *Productivity Insights Network* + synthesis paper entitled “Productivity Perspectives” which integrated evidence and arguments regarding the productivity slowdown from around the world was described by Murray Sherwin, Chair of the New Zealand Productivity Commission, as “perhaps the best article of its sort that I have seen”.

The review of (McCann and Vorley) *Productivity Perspectives* by Dame Kate Barker for the Society of Professional Economists reads “As an insight into current debates on this topic the book is invaluable, and hard to do justice to in this review... This is an important set of papers and a testament to the range and depth of the work of the Productivity Insights Network. It contains many strands and details which policymakers need to be aware of, should explore further, but most importantly should act on.” See: <https://spe.org.uk/reading-room/book-reviews/productivity-perspectives/>

The review of (McCann and Vorley 2020) *Productivity Perspectives* and (McCann and Vorley 2021) *Productivity and the Pandemic* by Bart van Ark in the *International Productivity Monitor* Volume 40, Spring 2021, states that “These two volumes from the Productivity Insight Network represents a major achievement in bringing together a broad range of insights related to the productivity puzzle”. See: [http://www.csls.ca/ipm/40/IPM\\_40\\_vanArk.pdf](http://www.csls.ca/ipm/40/IPM_40_vanArk.pdf)

Alexandra Tsvetkova from the OECD Spatial Productivity Laboratory describes both the thematic threads running through the book and also the productivity-related questions as “exciting” and continues that “The conversation started by this book needs to continue – so we can make strong and widely shared productivity growth a reality in more places and for more people and firms.” *Regional Studies*, 56.3, 518–520

The *International Journal of Society Systems Science*, 13.1, 2021, describes the volume as “an excellent book...[which]... provides new thinking on many dimensions including empirical evidence, analytical arguments and conceptual insights.”.

Interview with Philip McCann from the Faculty of Spatial Sciences at the University of Groningen, during the European Week of Regions and Cities (Open Days) 2009, organised in Brussels from 5 to 8 October 2009. Philip McCann explains how the crisis shows the power of international markets. Cohesion policy, he argues, is the EU’s primary tool for managing the current processes of transition
